

Commonwealth Veterans Fencing Championships, Largs, Scotland, 16th – 19th November 2014

Weapons Control

1 Where?

Weapons Control (WC) will be carried out in a designated and signposted area within Hall 2 at Inverclyde Sports Centre, Largs.

2 When?

Weapons control will be take place the day before that weapon's individual event. In other words:

	Weapons	Deliver to WC	Collect from WC	Re-tests and control of new equipment only
Saturday 15th November	Men's Epee, Women's sabre		0900 - 2100	
Sunday 16th November	Women's foil Men's sabre	0700 - 0900	~ 1430	1500 - 1700
Monday 17th November	Women's epee Men's Foil	0700 – 0900	~ 1430	1500 - 1700

3 How?

With the exception of England (who have a squad of over 130) equipment must be delivered to WC by team managers or officials, only at the designated times above. You should use fencing bags, which should be clearly labelled with country, team and weapon (labels will be provided) – for example, "Scotland Men's epee" - and containing an inventory of bag contents (also to be provided to team managers). For large teams it would be helpful if all weapons are in one (or more) bag, masks in another and wires, gloves and lames in another. Receipts will be provided.

Equipment will NOT be received by WC from individual competitors (except England, see above), only from team officials.

Labels and inventory forms will be issued to Team Managers through hotel receptions.

Equipment from teams must also be collected in total at the designated times by team officials, not as separate items by individual fencers. The receipt (see above) must be available.

4 What?

	Weapon (maximum 4)	Mask (maximum 2)	Body wires (maximum 4)	Head wires (maximum 4)	Lame (maximum 2)	Glove or glove and overlay (max 2)
Epee	Full dimensions and configuration	Inspection for compliance and condition	Compliance and Resistance	N/A	N/A	Condition
Foil	Full dimensions and configuration	Inspection for compliance and condition, Bib resistance	Compliance and Resistance	Compliance and Resistance	Condition and resistance	Condition
Sabre	Full dimensions and configuration	Inspection for compliance and condition, Resistance	Compliance and Resistance	Compliance and Resistance	Condition and resistance	Compliance and condition

It is recommended that the maximum amount of kit is submitted to WC on the first test run.
